9/22/19 Finder has seen cat in neighborhood for 2 weeks, she kept cat in carrier, cat seemed housetrained, got along with dog and other cat, wearing a blue and white collar with a bowtie, finder not willing to transport for SNR. On intake cat was easy to handle and administer treatment.

9/23/19 If not reclaimed, RTF after stray hold

9/24/19 Check with medical team for urinary concerns if reclaimed. Owner will need to follow up with family veterinarian

9/25/19 finder called and said she is interested in adopting cat.

9/26/19 Finder called several times yesterday expressing interest in adopting cat. Cat was originally tracked for possible RTF, changed sub status to AVE as the urinary concerns have not been resolved. Once medically cleared, hold for interested adopter.

****so the cat had urinary tract concerns but was going to be released as RTF if not claimed.**
